
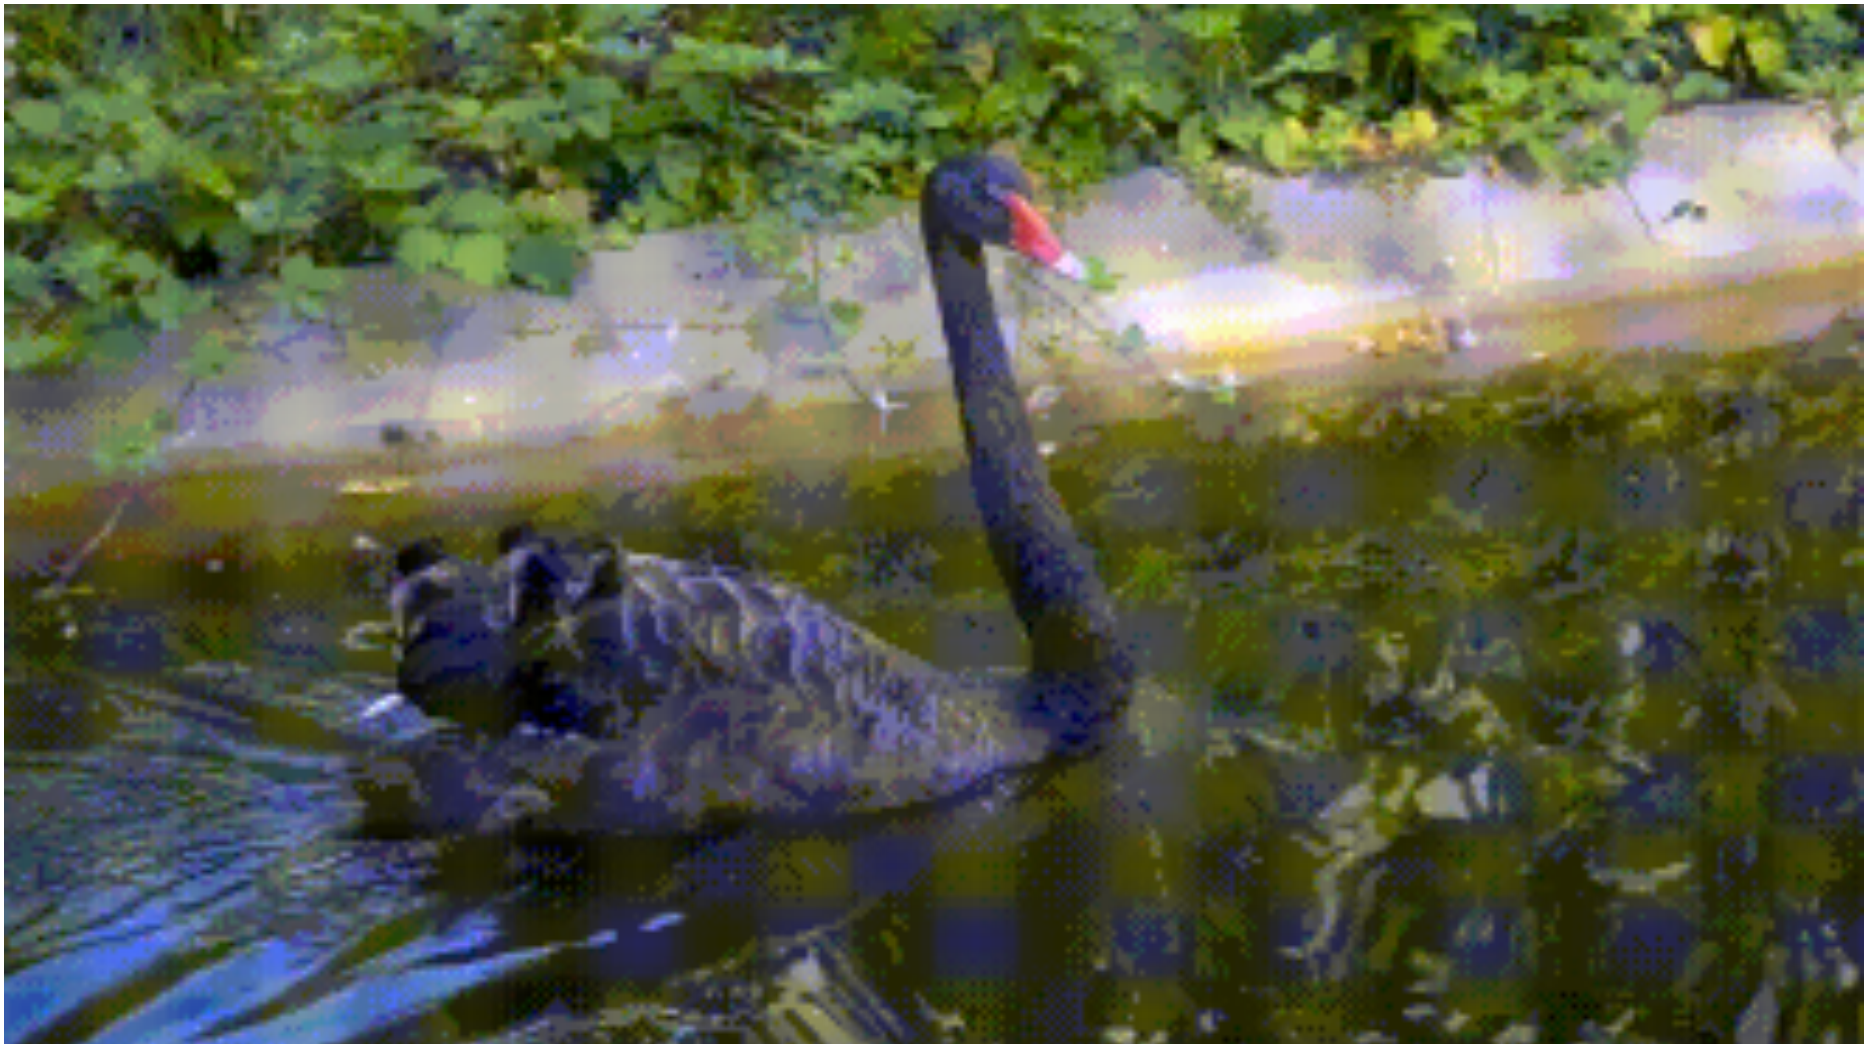
Text-to-Image/Video Editing

- **FiVE-Bench**: Video Editing Benchmark for Diffusion Models (ICCV 2025)
- **DNAEdit**: Text-Guided Rectified Flow Editing (NeurIPS 2025 **Spotlight**)
- **SplitFlow**: Inversion-Free Text-to-Image Editing (NeurIPS 2025)
- **DVRF**: Delta velocity rectified flow for text-to-image editing (CVPR 2026)



Change the black swan to a flamingo

Change the tiger to a cat

My Research Topics

Text-to-Image (T2I) Editing

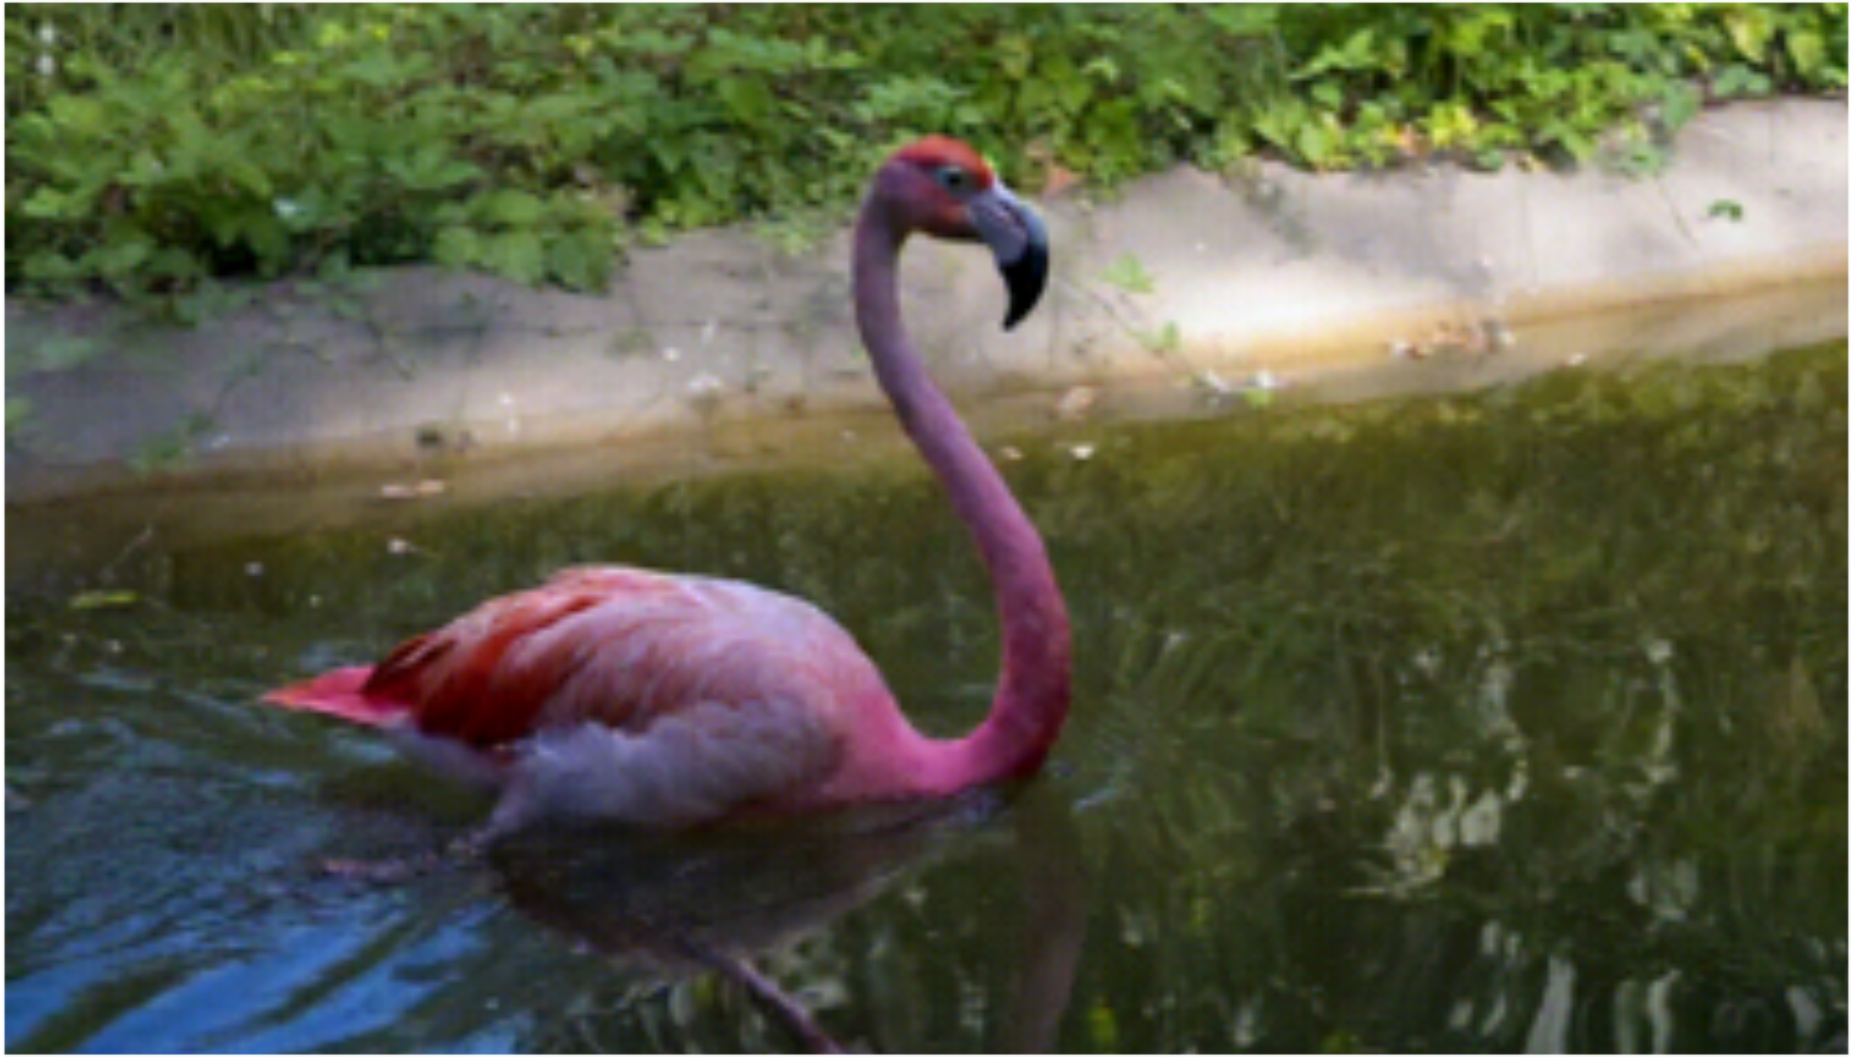
(

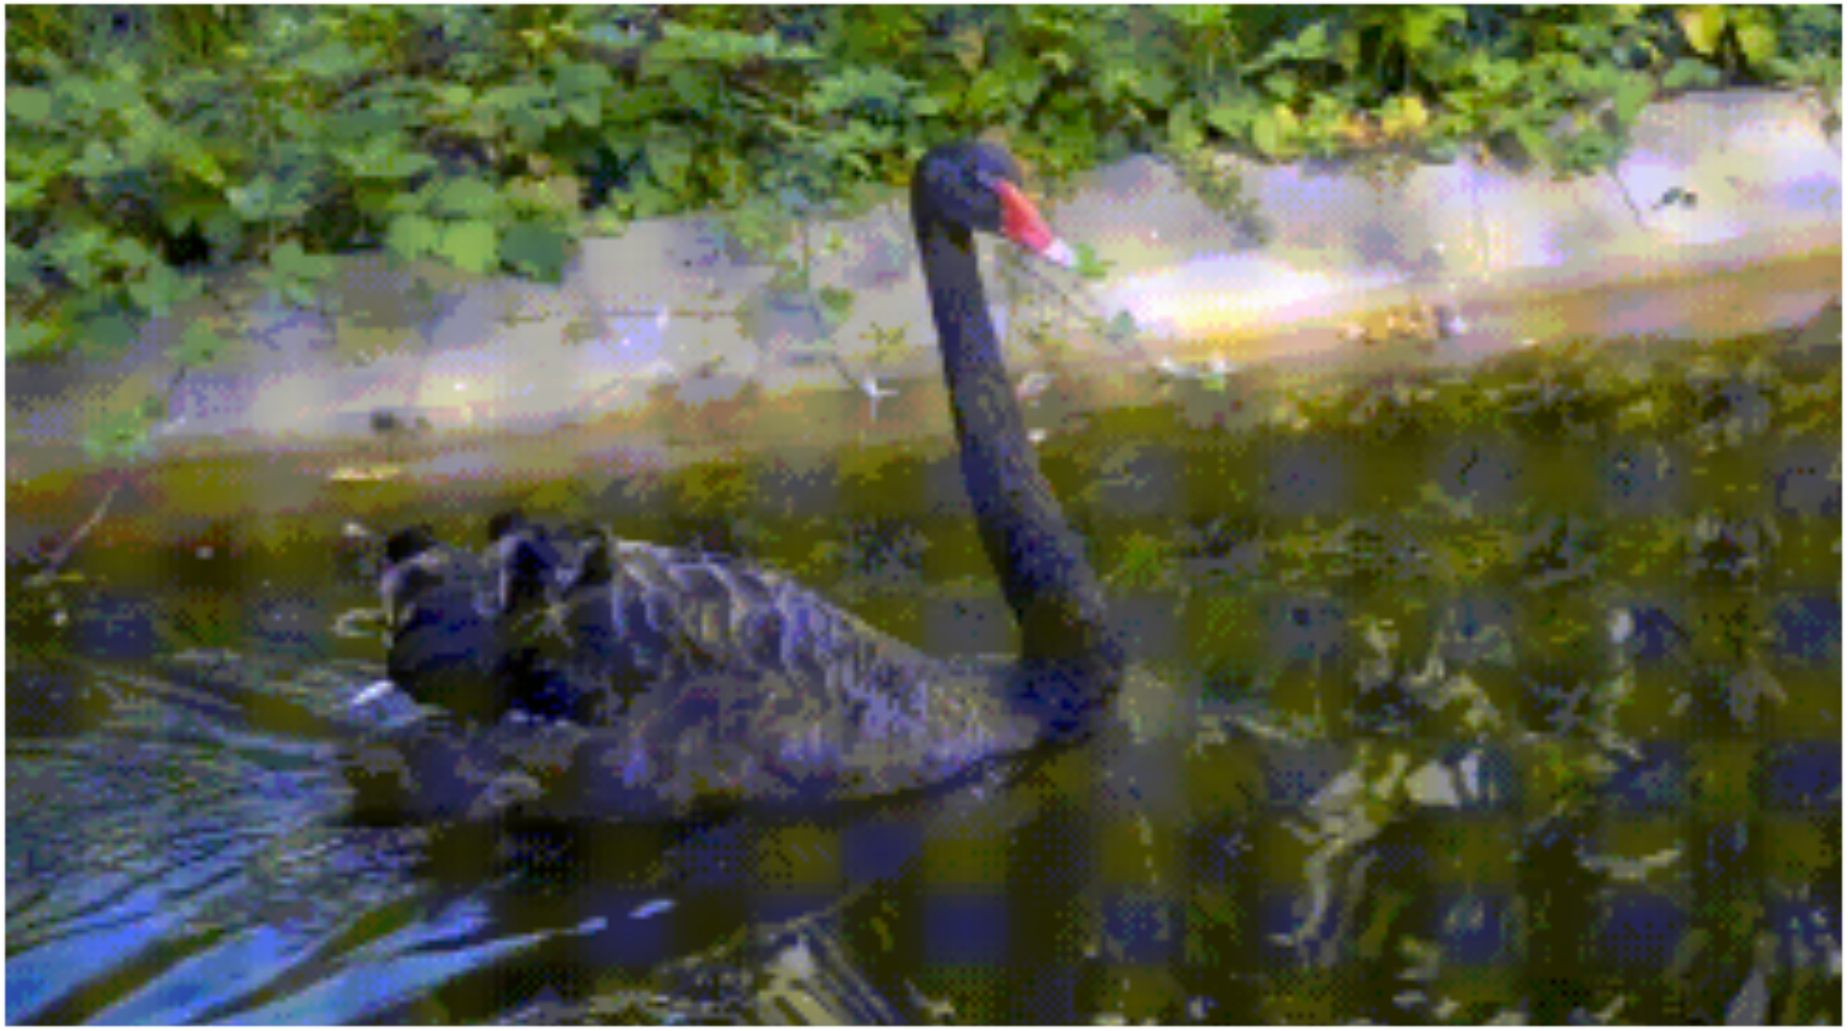
1. Source

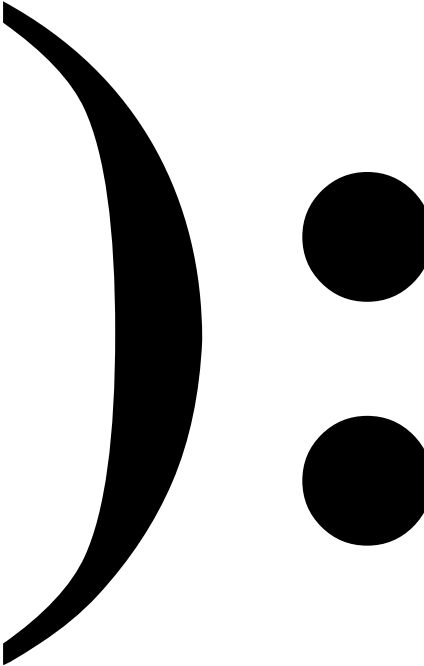
Image

)

$$x_{src}$$







2. Source text guidance

(

$$y_{src}$$

Input

Two key goals:

1. **Fidelity / reconstruction**: ***non-edited area*** looks the same as the source video

2. **Instruction following**: ***the edited area*** aligns well with the user intent (~~**tiger**~~ **a cat**)

3

Output

Editing

Image

Text-to-

3. Language instruction or target text guidance (y_{tar}):

Change the ***tiger*** to a ***cat***

A small orange-and-white **cat** lies on the grass.

A small orange-and-white

tiger lies on the grass.
