DMs: ODE Inversion

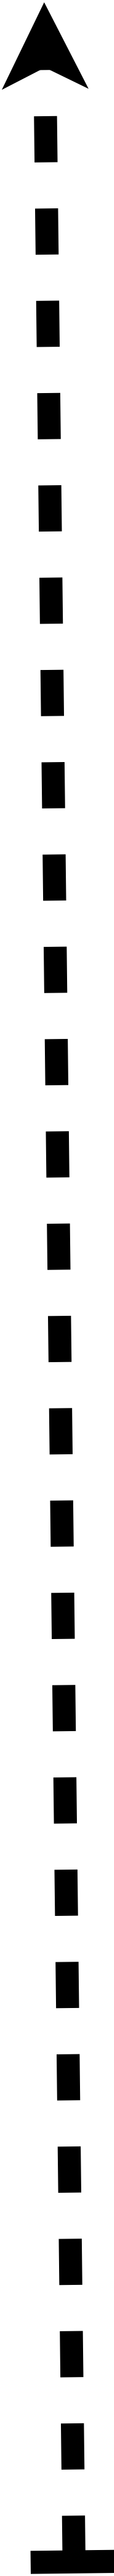
- **Rich diversity/fixability**

RFs: Delta Velocity Injection

- **Fine-grained control**

FREE

CAFE



Core Idea is Better Tradeoff

Goal #1: Fidelity / Reconstruction

Goal #2:
Instruction following
Editing capability

User instruction:

Add ***a glass*** next to ***the cookie***

User instruction:

Replace "***CAFE***" with "***FREE***"

3

- **DNAEdit:** Text-Guided Rectified Flow Editing (NeurIPS 2025 **Spotlight**)

Issue: Reconstruction is not perfect → poor fidelity (Direct Noise Alignment @NeurIPS25 Spotlight)

- **SplitFlow**: Inversion-Free Text-to-Image Editing (NeurIPS 2025)

Issue: **Text guidance is too weak → poor instruction following (DVRF @ CVPR26)**
